CONTROL SURVEY							
Wholesale Application							
#	ASKD Domain	Security Control Requirement	Applicable Policy/Standard	Response	Comments	Short Name	Applicable NIST 800-53 (Rev 4) Objective
1.1	Authentication & Identification (AN)	Does the application leverage a company's standard authentication control for providing single-sign-on capability?	Best Practice	No		User Authentication	
1.2	, ,	Is multi-factor authentication as defined by the Information Security Standard leveraged for all users this application?	GISS Information Systems: 8.1.5	Yes		Multi-Factor Auth	
1.3		Is multi-factor authentication as defined by the Information Security Standard leveraged for administrative users this application?	GISS Information Systems: 8.1.4	TDD		Multi-Factor Admin Auth	
1.4		Are minimum password requirements for user accounts established in	GISS Information	TBD		Password Strength	
1.5		compliance with Information Seucrity Standards?  Are service account credentials stored and managed using a Privileged	Systems: 7.2 GISS Information	No		Credential Management	
1.6		Account Management solution?	Systems: 6.6.3	Yes		Socured Basewords	
1.0		Are passwords secured using hash + salt functions using strong cryptographic algorithms?	GISS Information Systems: 7.1.13 & 13.x	: TBD		Secured Passwords	
1.7		Are user accounts in the application locked out after a defined number of failed login attempts	Best Practice	No		Account Lockout	
2.1	Authorization / Access	Is the process for provisioning and deprovisioning users within the application documented?	GISS Information Systems: 6.4			User Provisioning	
2.2	Control (AZ)	Are users authorizations managed within a centralized tool?	Best Practice	Yes TBD		User Authorization	
2.3		Is a centralized list of all personnel with access to "SECRET" data established and maintained	GISS Information Classification: Exhibit			Secret Data Access	
2.4		Does the application use role-based access controls and principles of least	1: Applicability GISS Information	No		RBAC	
		privilege to assign user authorization?	Systems: 6.2	Yes			
2.5		Are periodic reviews of user access rights conducted, at minimum, every six months?	GISS Information Systems: 6.7	TBD		Access Audits	
3.1	Configuration Security (CS)	Has the application been deployed on approved images or configurations and kept up to date using a patch management lifecycle?	GISS Information Systems: 4 & 5	No		Patch Management	
3.2	·/	Has a web application firewall been deployed and configured specifically for this application?	Best Practice	Yes		WAF Implementation	
3.3		Does the application employ a multi-tiered design in which the presentation	Best Practice	165		Multi-tier Application	
3.4		layer is isolated from other network segments?  Is the application hosted on servers that are installed in a company owned	0	TBD		Design Authorized Hosting	
		data center or authorized secure facility?		No		_	
3.5		Is the application hosted on cloud service providers such as AWS, Azure, Google Cloud, etc.?	0	Yes		Cloud Hosted	
3.6 4.1	Logging & Audit (LG)	Is the application protected by standard Anti-DDOS solution?  Does the application log sufficient information regarding user successes and	Best Practice GISS Information	TBD		DDOS Logging	
	Logging a riddit (Lo)	failures to reconstruct user activity?	Systems: 10.2 & GISS Monitoring: 3.1	No		2088118	
4.2		Are application logs written to a location that is protected from unauthorized	GISS Monitoring: 3.5	Yes		Log Management	
4.3		access by systems personnel or other external parties? Is an automated log retention mechnism established to ensure the availability				Log Retention	
4.4		of log files?  Are application events forwarded to centralized and monitored SIEM with	Systems: 10.3 GISS Information	TBD		Log Events	
4.5		event notifications defined? Is user activity routinely reviewed to identify potential anomolous user activity	Systems: 10.4 Best Practice	No		Log Activity Audits	
5.1	Request Forgery / Non-	or fraudlent use?  Does the application make use of standard components for implementing	Best Practice	Yes		Request Forgery	
5.1	Repudiation (RF)	anti-request forgery tokens?	Dest i factice	TBD		Request Forgery	
5.2		Do critical user actions (changing password, initiating a financial transaction, etc.) require re-authentication of the user?	Best Practice	No		ReAuthentication	
6.1	Sensitive Data Protection	Does the application leverage encryption on all communications channels that transmit Secret, Confidential or Personal data?	GISS Information Systems: 13.1.2	Yes		Encryption in Transit	
6.2	(SD)	Does the application leverage encryption to protect all Secret, Confidential or	GISS Information			File Encryption at Rest	
6.3		Personal data that is written to files?  Does the application leverage encryption to protect all Secret, Confidential or	Systems: 13.1.3 GISS Information	TBD		DB Encryption at Rest	
7.1	Session Management	Personal data that is written to databases?  Are users sessions automatically terminated after a defined period of	Systems: 13.1.3 Best Practice	No		Session Inactivity	
	(SM)	inactivity?		Yes		,	
7.2		When user sessions are terminated, does the application remove all sensitive data from the screen/page or redirect the user to a new	Best Practice			Session Termination	
7.3		screen/page?  Does the application make use of common libraries or components for	Best Practice	TBD		SM Libraries	
8.1	Validation & Encoding	generating and managing session identifiers?  Does the application make use of any Anti-Cross Site Scripting or other	Best Practice	No		Anti XSS	
	(VE)	common input validation libraries/components?		Yes			
8.2		Are acceptable/expected input characteristics defined for all data elements received from the user or other external systems?	Best Practice	TBD		Input Validation	
8.3		Is standard output encoding used on all user entered data returned to the user interface?	Best Practice	No		Output Encoding	
9.1	Extensible Design (XD)	Are reusable common libraries used for any typical application functionality (Authentication, Authorizataion, Logging, etc.)?	Best Practice	Yes		Common Libraries	
9.2		Is the creation of design specifications, requirements definitions and other	Best Practice	TBD		Sec Requirements	
9.3		project artifacts enforced? Have common application functions been designed according to common	Best Practice			Secure Design	
10.1	Security Verification (SV)	design guidance or reference architectures?  Does the application undergo penetration testing on a monthly basis?	GISS Vulnerability	No		Penetration Testing	
10.2	. ,	Do application development teams submit application source code for a	Management: 8 Best Practice	Yes		_	
		security review during the development lifecycle?		TBD		Code Review	
10.3		phases of application development?		No		Threat Modeling	
10.4		Are infrastructure level vulnerability scans performed against the application's servers consistent with the Information Security Standard on	GISS Vulnerability Management: 8			Infrastructure Scans	
10.5		Vulnerability Management?  Are infrastructure level vulnerability scans performed against the	GISS Vulnerability	Yes		Infrastructure Scans	
. 5.0		application's servers consistent with the Information Security Standard on Vulnerability Management?	xvxcvbcxvxcv 8	TBD		astructure staris	
11.1		Has a vendor security assessment been performed against the vendor of this				Vendor Assessment	
11.2	(TM)	application?  Does the application's vendor provide regular security vulnerability updates	Management: 4.1b Best Practice	No		Vendor Security Updates	
		to the organization?		Yes			
11.3		Have vendor contracts been structured to include performance objectives and penalties for resolution of security vulnerabilities?	Best Practice	TBD		Vendor Contracts	
11.4		Has the application vendor provided attestation of security assurance activities (vulnerability scans, penetration tests) conducted?	Best Practice	No		Vendor Attestation	
11.5		Has the vendor signed a confidentiality agreement with Company?	GISS Third-Party	Yes		Vendor NDA
