CONTROL SURVEY

Payments System

#	ASKD Domain	Security Control Requirement	Applicable Policy/Standard	Response	Comments	Short Name	Applicable NIST 800-53 (Rev 4) Objective
1.1	Authentication &	Does the application leverage a company's standard authentication control for providing single-sign-on capability?	Best Practice			User Authentication	
1.2	Identification (AN)	for providing single-sign-on capability? Is multi-factor authentication as defined by the Information Security Standard	GISS Information	No		Multi-Factor Auth	
1.3		leveraged for all users this application? Is multi-factor authentication as defined by the Information Security	Systems: 8.1.5 GISS Information	Yes		Multi-Factor Admin Auth	
1.5		Standard leveraged for administrative users this application?	Systems: 8.1.4	TBD		Multi-ractor Admin Adm	
1.4		Are minimum password requirements for user accounts established in compliance with Information Seucrity Standards?	GISS Information Systems: 7.2	No		Password Strength	
1.5		Are service account credentials stored and managed using a Privileged	GISS Information			Credential Management	
1.6		Account Management solution?	Systems: 6.6.3 GISS Information	Yes		Secured Passwords	
		Are passwords secured using hash + salt functions using strong cryptographic algorithms?	Systems: 7.1.13 & 13.x			Secured Fussion us	
1.7		Are user accounts in the application locked out after a defined number of	Best Practice	TBD		Account Lockout	
		failed login attempts		No		recourt Eschout	
2.1	Authorization / Access Control (AZ)	Is the process for provisioning and deprovisioning users within the application documented?	GISS Information Systems: 6.4	Yes		User Provisioning	
2.2	control (viz)	Are users authorizations managed within a centralized tool?	Best Practice	TBD		User Authorization	
2.3		Is a centralized list of all personnel with access to "SECRET" data established and maintained	GISS Information Classification: Exhibit			Secret Data Access	
		Does the application use role-based access controls and principles of least	1: Applicability GISS Information	No		2246	
2.4		privilege to assign user authorization?	Systems: 6.2	Yes		RBAC	
2.5		Are periodic reviews of user access rights conducted, at minimum, every six months?	GISS Information Systems: 6.7	TBD		Access Audits	
3.1	Configuration Security	Has the application been deployed on approved images or configurations and kept up to date using a patch management lifecycle?	GISS Information Systems: 4 & 5	Ne		Patch Management	
3.2	(CS)		Best Practice	No		WAF Implementation	
3.3		this application? Does the application employ a multi-tiered design in which the presentation	Best Practice	Yes		Multi-tier Application	
5.5		layer is isolated from other network segments?		TBD		Design	
3.4		Is the application hosted on servers that are installed in a company owned data center or authorized secure facility?	0	No		Authorized Hosting	
3.5		Is the application hosted on cloud service providers such as AWS, Azure, Google Cloud, etc.?	0	Yes		Cloud Hosted	
3.6		Is the application protected by standard Anti-DDOS solution?	Best Practice	TBD		DDOS	
4.1	Logging & Audit (LG)	Does the application log sufficient information regarding user successes and failures to reconstruct user activity?	GISS Information Systems: 10.2 & GISS			Logging	
			Monitoring: 3.1 GISS Monitoring: 3.5	No			
4.2		access by systems personnel or other external parties?	-	Yes		Log Management	
4.3		Is an automated log retention mechnism established to ensure the availability of log files?	GISS Information Systems: 10.3	TBD		Log Retention	
4.4		Are application events forwarded to centralized and monitored SIEM with event notifications defined?	GISS Information Systems: 10.4	No		Log Events	
4.5		Is user activity routinely reviewed to identify potential anomolous user activity or fraudlent use?		Yes		Log Activity Audits	
5.1	Request Forgery / Non-	Does the application make use of standard components for implementing	Best Practice	103		Request Forgery	
5.2	Repudiation (RF)	anti-request forgery tokens? Do critical user actions (changing password, initiating a financial transaction,	Rest Practice	TBD		ReAuthentication	
		etc.) require re-authentication of the user?		No			
6.1	Sensitive Data Protection (SD)	Does the application leverage encryption on all communications channels that transmit Secret, Confidential or Personal data?	GISS Information Systems: 13.1.2	Yes		Encryption in Transit	
6.2		Does the application leverage encryption to protect all Secret, Confidential or Personal data that is written to files?	GISS Information Systems: 13.1.3	TBD		File Encryption at Rest	
6.3		Does the application leverage encryption to protect all Secret, Confidential or	GISS Information	No		DB Encryption at Rest	
7.1	Session Management	Personal data that is written to databases? Are users sessions automatically terminated after a defined period of	Systems: 13.1.3 Best Practice	INO		Session Inactivity	
7.0	(SM)	inactivity?	Deat Deather	Yes			
7.2		When user sessions are terminated, does the application remove all sensitive data from the screen/page or redirect the user to a new	Best Practice			Session Termination	
7.3		screen/page? Does the application make use of common libraries or components for	Best Practice	TBD		SM Libraries	
	Validation 9 Faceding	generating and managing session identifiers? Does the application make use of any Anti-Cross Site Scripting or other	Best Practice	No			
8.1	Validation & Encoding (VE)	common input validation libraries/components?	Dest i ractice	Yes		Anti XSS	
8.2		Are acceptable/expected input characteristics defined for all data elements received from the user or other external systems?	Best Practice	TBD		Input Validation	
8.3		Is standard output encoding used on all user entered data returned to the user interface?	Best Practice	No		Output Encoding	
9.1	Extensible Design (XD)	Are reusable common libraries used for any typical application functionality	Best Practice			Common Libraries	
9.2		(Authentication, Authorizataion, Logging, etc.)? Is the creation of design specifications, requirements definitions and other	Best Practice	Yes		Sec Requirements	
9.3		project artifacts enforced? Have common application functions been designed according to common	Best Practice	TBD		Secure Design	
		design guidance or reference architectures?		No			
10.1	Security Verification (SV)	Does the application undergo penetration testing on a monthly basis?	GISS Vulnerability Management: 8	Yes		Penetration Testing	
10.2		Do application development teams submit application source code for a security review during the development lifecycle?	Best Practice	TBD		Code Review	
10.3		Are Design Reviews/Threat Modeling conducted as part of the early concept	Best Practice			Threat Modeling	
10.4		phases of application development? Are infrastructure level vulnerability scans performed against the	GISS Vulnerability	No		Infrastructure Scans	
		application's servers consistent with the Information Security Standard on Vulnerability Management?	Management: 8	Yes			
10.5		Are infrastructure level vulnerability scans performed against the	GISS Vulnerability			Infrastructure Scans	
		application's servers consistent with the Information Security Standard on Vulnerability Management?	xvxcvbcxvxcv 8	TBD			
11.1		Has a vendor security assessment been performed against the vendor of this application?	GISS Third-Party Management: 4.1b	Ne		Vendor Assessment	
11.2	(TM)	Does the application's vendor provide regular security vulnerability updates	Best Practice	No		Vendor Security Updates	
11 2		to the organization? Have vendor contracts been structured to include performance objectives	Post Practice	Yes			
11.3		and penalties for resolution of security vulnerabilities?	Best Practice	TBD		Vendor Contracts	
11.4		Has the application vendor provided attestation of security assurance activities (vulnerability scans, penetration tests) conducted?	Best Practice	No		Vendor Attestation	
11.5		Has the vendor signed a confidentiality agreement with Company?	GISS Third-Party	Yes		Vendor NDA	
			Management: 3.1	103		I .	1
