CONTROL SURVEY APS - Account Processing System

	APS - Account Processing System						
#	ASKD Domain	Security Control Requirement	Applicable Policy/Standard	Response	Comments	Short Name	Applicable NIST 800-53 (Rev 4) Objective
1.1	Authentication & Identification (AN)	Does the application leverage a company's standard authentication control for providing single-sign-on capability?	Best Practice	No		User Authentication	
1.2	,	Is multi-factor authentication as defined by the Information Security Standard leveraged for all users this application?	GISS Information Systems: 8.1.5	Yes		Multi-Factor Auth	
1.3		Is multi-factor authentication as defined by the Information Security Standard leveraged for administrative users this application?	GISS Information Systems: 8.1.4	TBD		Multi-Factor Admin Auth	
1.4		Are minimum password requirements for user accounts established in	GISS Information			Password Strength	
1.5		compliance with Information Seucrity Standards? Are service account credentials stored and managed using a Privileged	Systems: 7.2 GISS Information	No		Credential Management	
1.6		Account Management solution?	Systems: 6.6.3 GISS Information	Yes		Secured Passwords	
		Are passwords secured using hash + salt functions using strong cryptographic algorithms?	Systems: 7.1.13 & 13.x	TBD			
1.7		Are user accounts in the application locked out after a defined number of	Best Practice			Account Lockout	
2.1	Authorization / Access	failed login attempts Is the process for provisioning and deprovisioning users within the	GISS Information	No		User Provisioning	
2.2	Control (AZ)	application documented? Are users authorizations managed within a centralized tool?	Systems: 6.4 Best Practice	Yes TBD		User Authorization	
2.3		Is a centralized list of all personnel with access to "SECRET" data established and maintained	GISS Information Classification: Exhibit 1: Applicability	No		Secret Data Access	
2.4		Does the application use role-based access controls and principles of least privilege to assign user authorization?	GISS Information Systems: 6.2	Yes		RBAC	
2.5		Are periodic reviews of user access rights conducted, at minimum, every six months?	GISS Information Systems: 6.7	TBD		Access Audits	
3.1	Configuration Security	Has the application been deployed on approved images or configurations and kept up to date using a patch management lifecycle?	GISS Information Systems: 4 & 5	No		Patch Management	
3.2	(CS)	Has a web application firewall been deployed and configured specifically for	Best Practice	No Yes		WAF Implementation	
3.3		this application? Does the application employ a multi-tiered design in which the presentation layer is isolated from other network segments?	Best Practice			Multi-tier Application	
3.4		Is the application hosted on servers that are installed in a company owned	0	TBD		Design Authorized Hosting	
3.5		data center or authorized secure facility? Is the application hosted on cloud service providers such as AWS, Azure,	0	No		Cloud Hosted	
3.6		Google Cloud, etc.? Is the application protected by standard Anti-DDOS solution?	Best Practice	Yes TBD		DDOS	
4.1	Logging & Audit (LG)	Does the application log sufficient information regarding user successes and failures to reconstruct user activity?	GISS Information Systems: 10.2 & GISS			Logging	
4.2		Are application logs written to a location that is protected from unauthorized	Monitoring: 3.1 GISS Monitoring: 3.5	No		Log Management	
4.3		access by systems personnel or other external parties? Is an automated log retention mechnism established to ensure the availability		Yes		Log Retention	
4.4		of log files? Are application events forwarded to centralized and monitored SIEM with	Systems: 10.3 GISS Information	TBD		Log Events	
4.5			Systems: 10.4 Best Practice	No		Log Activity Audits	
5.1	Request Forgery / Non-	or fraudlent use? Does the application make use of standard components for implementing anti-request forgery tokens?	Best Practice	Yes		Request Forgery	
5.2	Repudiation (RF)	anni-request longery lowers? Do critical user actions (changing password, initiating a financial transaction, etc.) require re-authentication of the user?	Best Practice	TBD No		ReAuthentication	
6.1	Sensitive Data Protection (SD)	Does the application leverage encryption on all communications channels that transmit Secret, Confidential or Personal data?	GISS Information Systems: 13.1.2	Yes		Encryption in Transit	
6.2	(55)	Does the application leverage encryption to protect all Secret, Confidential or Personal data that is written to files?	GISS Information Systems: 13.1.3	TBD		File Encryption at Rest	
6.3			GISS Information Systems: 13.1.3	No		DB Encryption at Rest	
7.1	Session Management (SM)	Are users sessions automatically terminated after a defined period of inactivity?	Best Practice	Yes		Session Inactivity	
7.2	(5)	When user sessions are terminated, does the application remove all sensitive data from the screen/page or redirect the user to a new	Best Practice			Session Termination	
7.3		screen/page? Does the application make use of common libraries or components for	Best Practice	TBD		SM Libraries	
8.1	Validation & Encoding	generating and managing session identifiers? Does the application make use of any Anti-Cross Site Scripting or other	Best Practice	No		Anti XSS	
8.2	(VE)	common input validation libraries/components? Are acceptable/expected input characteristics defined for all data elements	Best Practice	Yes		Input Validation	
8.3		received from the user or other external systems? Is standard output encoding used on all user entered data returned to the	Best Practice	TBD		Output Encoding	
9.1	Extensible Design (XD)	user interface?	Best Practice	No		Common Libraries	
9.2	. ,	(Authentication, Authorizataion, Logging, etc.)? Is the creation of design specifications, requirements definitions and other	Best Practice	Yes		Sec Requirements	
9.3		project artifacts enforced? Have common application functions been designed according to common	Best Practice	TBD		Secure Design	
10.1	Security Verification (SV)	design quidance or reference architectures? Does the application undergo penetration testing on a monthly basis?	GISS Vulnerability	No		Penetration Testing	
10.2		Do application development teams submit application source code for a	Management: 8 Best Practice	Yes		Code Review	
10.3		security review during the development lifecycle? Are Design Reviews/Threat Modeling conducted as part of the early concept	Best Practice	TBD		Threat Modeling	
10.4		phases of application development? Are infrastructure level vulnerability scans performed against the	GISS Vulnerability	No		Infrastructure Scans	
10.5		application's servers consistent with the Information Security Standard on Vulnerability Management?	Management: 8	Yes			
10.5		Are infrastructure level vulnerability scans performed against the application's servers consistent with the Information Security Standard on Vulnerability Management?	GISS Vulnerability xvxcvbcxvxcv 8	TBD		Infrastructure Scans	
11.1		vulnerability management? Has a vendor security assessment been performed against the vendor of this application?	GISS Third-Party Management: 4.1b			Vendor Assessment	
11.2	(TM)	Does the application's vendor provide regular security vulnerability updates	Best Practice	No		Vendor Security Updates	
11.3		to the organization? Have vendor contracts been structured to include performance objectives	Best Practice	Yes		Vendor Contracts	
11.4		and penalties for resolution of security vulnerabilities? Has the application vendor provided attestation of security assurance	Best Practice	TBD		Vendor Attestation	
11.5		activities (vulnerability scans, penetration tests) conducted? Has the vendor signed a confidentiality agreement with Company?	GISS Third-Party	No		Vendor NDA	
<u> </u>		- · · ·	Management: 3.1	Yes		l
